

Jonathan Mihocas

Kitchener, ON | (519) 729-3313 | jmihocas@uoguelph.ca | [linkedin.com/in/JonathanMihocas](https://www.linkedin.com/in/JonathanMihocas)

Skills Overview

- Proficient in 2D drafting and 3D modeling using AutoCAD and SolidWorks, developed through academic coursework and personal projects.
- Intermediate knowledge of C programming and Microsoft Office applications, including Excel, with a strong aptitude for rapidly learning new technical software.
- Proven commitment to maintaining high safety and quality standards, demonstrated through rigorous equipment checks and adherence to protocols in fast-paced environments.
- Excellent communication and collaboration skills, working effectively within diverse teams to coordinate tasks, resolve issues, and achieve daily targets.
- Strong time management and adaptability, successfully balancing rigorous engineering coursework with personal projects and employment.
- Fluent in English, French, and Romanian.

Education

Bachelor of Engineering, Mechatronics Engineering (Co-op) September 2025 — Present
University of Guelph, Guelph, Canada

- Awarded University of Guelph Entrance Scholarship with an admission average of 94%
- Recognized on the Dean's List (83% average) while successfully managing a 56-hour weekly academic workload.
- Relevant courses include Engineering Mechanics (82%), Engineering Analysis (87%), and Material Science (82%).

Ontario Secondary School Diploma September 2021 – June 2025
Forest Heights Collegiate Institute, Kitchener, ON

- Ministry of Education Ontario Scholar (Grade 12 average well above 80%).
- Achieved Honor Roll status for academic excellence from December 2021 to May 2025.

Engineering Projects

Automated Mechatronic Vehicle Project September 2025 – December 2025
University of Guelph, Guelph, ON

- Designed and assembled a mechatronic control system using an Arduino microcontroller, breadboards, and custom wiring to automate vehicle movement.
- Constructed a robust chassis and structural frame using a Meccano kit, ensuring mechanical stability for wheels, axles, and internal components.
- Developed comprehensive technical drawings of the electrical system and vehicle architecture using AutoCAD to ensure precise assembly and documentation.
- Collaborated with team members to troubleshoot system integration issues, resulting in a fully functional automated prototype that met all design specifications.

AI-Integrated Software Development Project
University of Guelph, Guelph, ON

September 2025 – December 2025

- Designed and implemented a fully functional Tic-Tac-Toe application in C, featuring both player-versus-player and player-versus-computer modes.
- Developed a scalable game architecture that supports customizable grid sizes ranging from 3x3 to 10x10, demonstrating advanced logical reasoning and system-level thinking.
- Programmed enhanced decision-making logic for computer opponents using algorithmic strategies to optimize competitive gameplay.
- Utilized self-directed learning to master new programming methodologies and troubleshooting techniques, ensuring a seamless user interface and error-free execution.

Work Experience

Slide Attendant

June 2025 — September 2025

Bingemans Inc., Kitchener, ON

- Performed routine safety and equipment checks on facility assets, prioritizing a high standard of quality and hazard prevention for all guests.
- Collaborated with a team of lifeguards and staff in a fast-paced environment, ensuring efficient daily operations and rapidly resolving patron concerns.
- Communicated safety protocols and rules clearly to high volumes of daily visitors, demonstrating strong interpersonal skills and minimizing incident rates.

Housekeeping Specialist

June 2024 — September 2024

Muskoka Bible Center, Huntsville, ON

- Completed multiple daily facility assignments efficiently within strict deadlines, utilizing excellent time management skills to consistently meet organizational targets.
- Tracked inventory levels and safely handled chemical cleaning supplies, demonstrating a strong commitment to workplace safety protocols and operational efficiency.

Volunteer Experience

Maintenance Volunteer

June 2024 – September 2024

Muskoka Bible Center, Huntsville, ON

- Executed routine facility repairs and preventative maintenance alongside a dedicated team, utilizing a variety of hand tools to troubleshoot mechanical issues, successfully minimizing equipment downtime.
- Conducted comprehensive safety and functionality inspections on communal equipment, quickly resolving identified hazards to ensure a secure environment and maintain high operational efficiency for the campground.

Training and Certifications

SOLIDWORKS Design Associate (CSWA)	Completed May 2026
WHMIS	Completed September 2025
Standard First Aid and Basic Rescuer CPR Level "C" (Canadian Red Cross Active)	Completed April 2025
Active Bystander Training Completed (Mennonite Central Committee)	Completed January 2024
